By DENNIS BURNS, Managing Editor

Valley College's construction program took a giant step closer State Bond Election 1-A, make up the total. to completion this summer and the four new buildings which greeted fall students are only part of the story.

The Los Angeles Board of Education voted a 5-cent tax increase which will give the college two new buildings in addition to the nearly completed Phase III Math-Science, Business-Journalism, Planetarium and Art facilities.

Humanities and Behavioral Science buildings will be constructed north of the Power Plant as Phase IV with money allotted Valley College from the tax increase and reserve funds. The structures will face the present Foreign Language and Physics buildings.

Completion Due in 1964

Their completion date was tentatively set as the fall of 1964 by Robert N. Cole, dean of educational services. Construction could begin during the spring semester, he said. An estimated \$825,000 will be spent on the two buildings.

Funds totaling \$11,300,000 have been allocated by the Board for college building in 1963-64. The new 5-cent tax rate will provide \$2,800,000. A reserve balance of \$7,634,000, including funds from

the last bond election, out-of-district tuition and \$1,400,000 from

Construction financed by these funds is scheduled for Harbor. East Los Angeles, the new West Los Angeles campus, Trade-Tech, Los Angeles City and Pierce colleges, in addition to that at Valley.

The Math-Science building, among the four already in the final stages of completion, will house mathematics, earth science and home economics classes.

121/2-Inch Telescope

The Planetarium will hold classes in astronomy, geology and geography, as well as a complete weather station. A 121/2-inch telescope, equipped with tracking and timing devices for astrophotography, is being installed on the Planetarium's roof. A projector, the scaled down version of the instrument at the Griffith Park Observatory, will show relative star positions on the inside dome.

Latest art facilities are being installed in the college's Art building. Included in the equipment are new kilns, controlled by electronic programmers, power tools for ceramics and jewelry-making classes, an art gallery with special lighting effects and an enclosed

The Math-Science building is located next to the Planetarium and Engineering buildings, with the Business-Journalism facility east of it. The Art building is situated north of the cafeteria.

January Occupancy

Students will not be able to occupy the Phase III structures until January; however, two rooms are being utilized in the Math-Science building. The original completion date was set at November; however, late material delivery has been blamed for the delays. according to Cole.

Before the tax boost, the Los Angeles Junior College District was assessed at 24.21 cents per \$100 property evaluation. The rate now stands at 30 cents, still below the 35-cent ceiling imposed by state law.

The 5-cent increase will provide funds that are destined solely for building expenses. This move by the Board of Education may be the forerunner of new building program policy.

It was necessitated by the narrow defeat of Proposition B in recent school bond elections.

Coultas Explains Theory

Walter T. Coultas, assistant superintendent of schools in charge of junior colleges and adult education, explained the Board's theory: "It would be possible for the district to take care of the complete building program of the colleges without going to the citizens for additional money."

The tax increase will provide some of the buildings which would have been part of Proposition B.

New buildings will provide classroom space for English, speech

Football—the Student's Therapy

and perhaps George Ker.

A football game was originally supposed to pit two 11-man teams against one another in a contest of brute force and trickery. Using a simple scoring system, one team would be declared a winner by virtue of its performance on the grass playing field. This enabled the winning team to enjoy the rewards of hard work and determination, while the losing team was equally rewarded, by picking up on a lesson of being a good loser thereby learning good sportsmanship, even though it has always been nicer to win.

In recent years many people appear at football games for reasons other than to thing. As coach of the football team, he is watch the excitement on the playing field. too busy to notice the cute girls in the stands The hot dog lover cherishes his seat at the or to find out where the party is after the game which puts him within a mustard jar's game. LITTLE MAN ON CAMPUS

AT THE FORUM

Computer Composes Music Conglomeration

BY JOE DOJCSAK Fine Arts Editor 18Y X4-RXYUVFW IF (FY-3) 4. 2. 1.

Unless you're an IBM computer, chances are that you'll never comprehend this symbolic complexity as the ultimate in "way out" music.

eration of numbers and letters is the brain storm of the Grecian avantgarde composer Yannis Xenakis, who has incorporated into his music the elements of mathematical sciences, architectecture and biology.

This conglom-

Dojcsak

XENAKIS believes his music is the "expression of modern symbolic logic." Other musicians seem less enthusiastic about the fantastically complex style of writing.

Although the originator, who utilizes his engineering background in his weeks, has no problems translating data obtained from the IBM computer, few musicians can rehearse his latest work called "ST-10-1.080262," without having a nervous breakdown or developing a mild case of strabis-

ANY ATTEMPT to evaluate the composer's style, which is a parallel between music and architecture, is rather difficult. As an individualistic musical form, its descent cannot be traced back to any other composer. Even the style of one of the most avant garde musicians, Anton Webern, has evolved from atonal principals of Arnold Schoenberg.

There are some composers who insist that all sounds are music. Yet. even more important is the fact that any relative tone pattern must be understood by the general public before it can be classified as good or bad in

It has never been the duty of a composer to appease the desire of everyone at a concert; yet, if a musical form is to be considered a universal language, then that style must be interpreted and appreciated by an

individual—not by a computer. ONE MIGHT GO as far to say that Xenakis' compositions are egotistical in nature for he has made no attempt to utilize the intellectual advancements which have been made by composers in the past.

Because Xenakis' style is so completely specialized and complex, it may go through a period of decadence unless music enthusiasts are willing to bring along slide rules if they expect to decipher the jungle of rhythmic patterns.

Professor Says Fewer Projects

EAST LANSING, Mich. (IP) "The greatest fault of a student's theme is that he feels the mechanics of the paper are the most important thing," according to Benjamin Hickok, associate professor of American Thought and Language at Michigan State University.

He suggested that students should based on the works of authorities and fewer term papers. "Unfortunately there can be no uniform policy on grading and judging papers. If themes could be graded like a math problem or a physics problem where everything is absolute, then, and only then could a uniform policy for grading papers exist.'

Students have a fear of saying things in their themes, Professor Hickok said. They are restricted so much in high school that when they get to college they have to ask if it is all right to present their views in a theme, he continued

Professor Hickok said that he felt that faculty members of the English and American Thought and Language departments on this campus should teach a composition course at least once every two years.

VALLEY FORGE

College Reaches Beyond Classes

By MARTY SIMONS, Editor

Ever-changing Valley College continued to do just that while students enjoyed a three-month nap on the beach.

Valley's building program has enhanced the campus with new classrooms, William J. McNelis has returned from a year's sabbatical leave to fill the president's chair with a radiant smile and Jack

Easton, student body president, is book in hopes of leading Valley in a "spirit-ual" revolution.

STUDENT SPIRIT at most institutions of higher learning is always a problem even though the mentors of the college insist that theirs is the only school in the world without students

Marty

call with a rah-rah-rah Valley has made much progress in the past few years. It now appears that the moment of truth is here for the diehards who have looked beyond the "insurmountable" problems of college life to realize that these are the best years of one's life and that all of the rewards of college education are doubled at a school set in motion by spirit THE MOMENT OF TRUTH is here

for the more than 20 clubs on campus. Any club which is not strongly represented at Valley's football games reflects members who have no desire to help Valley as well as themselves and should lose their charter. The Inter-Organization Council can provide the driving force behind Valley's quest for life or can fall to its death.

Imagination and creativity are two assets which would surely bring the Executive Council closer to the students. The image of this supervisory board has passed through the apathetic minds of students where their existence goes unnoticed. Colleen Ferguson, commissioner of student activities, was instrumental in bringing excellent speakers to Valley last semester. She would enjoy an undeniable state of popularity were she to bless our campus with twice as many speakers this year.

WOMEN'S WEEK last semester education at Valley College

reaching into the Billy Graham song- was not a total success due to lack of participation, but the idea was good, and it could be developed into memorable week of activity for the women. While the women enjoyed activities all week long, where a man was "persona non grata," the men found consolation in looking forward to their own week ... it never came which served as a tremendous mora victory for the women and a loss of fun for the men.

The Quadwranglers may not be familiar to some students at Valley be cause it was discontinued when its sponsor John Buchanan, assistant professor of speech, left on a sabbati cal leave. The Quadwranglers pre sented many informative and excit ing debates in the quad at the south west corner of the campus. One suc debate brought two Los Angeles polices officers to Valley in response to a Valley College student's charge of negligence and brutality. Now that Prof. Buchanan has returned, hope are high that Quadwranglers w make their appearance once again after a very conspicuous absence.

VALLEY OFFERS many opportu nities for students in search of aca demic and social activities in addition to classroom learning. But a colleg can only offer so much and the ulti mate success of the school lies with the students.

Too often students come to Valley with preconceived notions which de not accurately describe the college These students fail to realize tha they are being afforded opportunitie unknown to the high school student

Students either attend most of the events provided for them at Valle or none at all. The student who open his eyes and attends one Athenaeur event, one football game or or dance realizes that a college educa tion reaches beyond his grade card and only then does he begin to enjoy the benefits and the purpose of his

Junior Colleges Establish New Trend By Night Classes

per take note of the long list of diversions which are offered to the public under the general heading of leisure time activities. If the list is of any consequence, it will contain the usual index of restaurants, amusement parks, night clubs and recreation fa-Just for the sake of being different.

a reporter working for the "News Herald Publications" listed a junior college in the entertainment section of the paper. Of course, some regarded this as a joke while others considered it a misprint.

Little did this reporter realize the validity of his practical joke. Today a total of 71 public junior colleges in California attract more than 70 per cent of the students taking their first and second year college courses. Even Disneyland can't compare with those

Surprisingly enough, the majority of these junior college students attend evening division classes. Proving to be more popular than a theater or television set, Valley College has captured the attention of more than 7,500 evening division students who have selected an educational program as a "leisure" time activity

Examination of this collegiate audience reveals that the average student is 30 years of age. He or she works at either a full or part time job. Half of the students plan to transfer to another college or university, while the remaining 50 per cent plan to follow the terminal program

The next time you read a newspa- and obtain their associate of arts

Thirty-three per cent of the students in evening division plan to transfer to San Fernando Valley State College and 14 per cent intend to go to UCLA. Thirty-three per cent are undecided as to which college t

Since 60 per cent of the evening division population is male, business education and engineering are th two most selected majors.

One of the principal reasons students attend school at night after working most of the day is that chances for promotions at work are much greater if the employe has college degree.

Not only is the student interested in his own welfare, but also are large aircraft corporations and electroni firms who send their employes to take such courses as computer tech nology, radiation and nuclear tech nology, technical writing and engi neering classes.

By 1975, it has been estimated that 254,800 students will be enrolled in the junior colleges in California. It i a possibility that junior colleges wil no longer be tuition free. During th fall semester of 1964, out-of-state students will be required to pay tuition fees before they are admitted into the junior colleges.

Pres. McNelis . . . (Continued from Page 1)

more competitive make for a better student," said the president.

For every hour of class work there should be a minimum of two hours of study, stated McNelis. "This gives the student a 45-hour work week with only study and attending classes."

One of the most important decisions a student has to make when he comes to college, said McNelis, is the field he is to choose for his work in the future. "This," said the president "is an extremely difficult decision for a young person.'

ator from Arizona. The Valley Star interview followed a press conference held at Dodger Stadium, which preceded Goldwater's speech before 42,217 Republican sup-

Denounces Democrats

During his press conference Goldwater denounced Congressional Democrats for the current race crisis in the South. He blamed Democrats for failing to adopt a civil rights amendment that he and Sen. Jacob Javits (R-N.Y.) co-authored in favor of a watered-down proposition proposed

Goldwater also condemned the bombing of a Birmingham, Ala., church, which killed four children. He stated disapproval of Gov. George Wallace's handling of integration in Alabama, although he opposed the use of Federal troops "unless requested by the Legislature or chief execu-

When informed that California's Gov. Edmund G. (Pat) Brown had refused to indict the Young Democrats after their recent "left-wing" resolutions, Goldwater replied, "Well, I'm certainly happy to see that Gov. Brown thinks people have rights. I remember him demanding that Nixon condemn the John Birch Society for its stand on national issues." Asked to compare the allegedly radical stands of the Young Democrats and Young Republicans. Goldwater replied, "I'll take the Young Republicans. Their stands won't weaken America." Goldwater challenged Gov. Brown to compare his accomplishments in the field of anti-discrimina-

'Rocking Chair Leadership'

Later in the evening Goldwater spoke before a near-capacity crowd in Dodger Stadium where he attacked "Rocking-chair leadership" in the Kennedy administration. "We need an administration to serve all the people, and not to serve political machines....We don't need a government that takes and takes, but rather one that works and works with the people—not over them."

Both in his press conference and his speech Goldwater opposed those Republicans who he claimed were trying to read others out of the party. "The Republican Party doesn't stand for just one man or one family, but the party stands for every man A bulletin to this effect to be read and every family...the Republican Party must not be a captive of the Democratic Party. Republicans don't want a nation governed from a rocking-chair."

Goldwater concluded his remarks before the largest Republican gathering in recent years with the statement, "We are not a sectional party. Knarr, Kroviak, Gudzus and Marshall trunk with them. You can't be too We are the American Party."

Several mediums of art will be displayed on Club Day

Some of our stockholders work at night

Communist workers must find it very hard to understand that an American can be an employee and also an owner of the business.

For instance: All Standard Oilers who are 35 or older, and have 5 years of service, may invest a portion of their pay in Standard shares if they wish, through monthly deposits in our Employee Stock Plan.

The Company adds a contribution, which has averaged

more than \$1.50 for every \$1.00 deposited by employees. When a Standard Oiler retires, dividends from his accumulated stock add to his other retirement benefits.

The Employee Stock Plan is now the largest single holder of Standard Oil stock.

Yes, the husky fellows on that night drilling crew are Standard Oil stockholders. They own a piece of the Company, and share in its profits.

Planning ahead to serve you better

STANDARD OIL COMPANY OF CALIFORNIA

Kingsize Ker Has Big Hopes

By DICK SHUMSKY, Sports Editor

With the Valley football season just a little over a week from getting under way, one of the more colorful figures on campus will be the head grid coach, George Ker.

For those who are not yet acquainted with Ker, it should be pointed out that he is the only human on earth who would make Sonny Liston afraid. Ker is so broad shouldered that he has to walk sideways to avoid knocking over bungalows. He stands well over the six-foot mark, but he is twice that size when measured from shoulder to shoulder. When he wears a suit jacket it looks as though he forgot to take off his shoulder pads.

Ker-vs.-Elephants

Ker's stature has caused the kids who watch the football practices to make up an elephant joke in his honor. The joke goes: Why do elephants wear red shoes? The answer: So that they can be distinguished from Ker who wears browns shoes.

In his college days at the University of the Pacific, Ker was an outstanding member of the football team. His position was the defensive line—the whole line. He wore five different numerals on his jersey and the opposition thought they were up against five bodies with just one head. Actually, ker was meant to be triplets-but something went wrong.

No Secrets

One thing is certain, the big coach has the loudest voice of anyone at Valley. Before Ker took over the coaching duties in 1962, the Bakersfield people used to send down scouts to look over Valley's material. Now they just open their windows and eavesdrop on Ker from 120 miles.

I would think that the worst thing that could possibly happen to a Monarch football player would be to have to face Ker after losing a game. But last year we must have had courageous players, for they aropped eight games and not a one fled the city.

Wierd Sense of Humor

Although I have talked with Ker on numerous occasions, I still can't tell when he is putting me on. He usually uses a gruff voice and feigns anger. Although I am almost sure he is kidding, he is just too big to take lightly.

Despite all his pretenses of being somewhat surly and gruff, Ker is one of the most friendly men on campus. He also exhibits rare patience. Last year lesser men would have given up on Valley's inept team. But Ker stayed with them to the bitter end and never let them down by throwing in the towel.

His patience may reap benefits starting a week from Saturday when Valley takes on San Francisco City College at Monarch Stadium. Some 16 lettermen from the 1962 team are coming back for more, and to a man they hope to wipe away bitter memories and do well for Ker.

Ker is one of the most popular and respected professors at Valley. And I hope that he is rewarded in the coming weeks by a big student following and a winning football team. As the old and tired sports cliche goes: It couldn't happen to a nicer and more deserving person than to Ker.

BLIND MAN'S BLUFF—Valley quarterback John rugged Monarch defensive line during a scrimmage.

Schek can't bear to look as he hands off to half- Valley's first game will take place a week from Satback Phil Culotta. The play took place against the urday, when they host San Francisco City College. -Valley Star Photo by Roger Karraker

Director Names Coach

Sal Terrusa Takes Line Post

Sal Terrusa, formerly a line coach at Mt. Carmel High in Los Angeles, was recently announced as Valley College's new line coach for the coming football season by athletic director Ben McFarland.

The appointment, necessitated by the untimely death of Bus Sutherland last November, completes the football coaching staff for the coming season. Last year Sutherland mentored the Valley backfield while Nick Giovinazzo coached the line. Giovinazzo will move to the defensive backfield this

Holds Two Jobs

Although Terrusa was named to the line post, he will not be a member of Valley's full-time faculty. As he has done for the past three years, Terrusa will head the Jacob Rils High School physical education department in Los Angeles.

During the afternoons he will

commute to the Valley for Monarch football practices.

Terrusa will bring with him eight years of playing and one year of coaching experience. Last year he had the misfortune of coaching a luckless Mt. Carmel eleven. Competing in the same league as CIF Southern Section champion Loyola, Mt. Carmel trudged through the year winning only two games while losing

The new coach's playing days began at Marshall High in Los Angeles where he lettered three times. Upon graduation he entered Los Angeles City College where he received two more years of experience.

UCLA-Blocking Back

In 1951 Terrusa transferred to UCLA where he held the position of blocking back in Coach Red Sanders' single wing formation.

For personal reasons, the following year, Terrusa transferred to Los Angeles State where he received his Bachelor of Arts in Physical Education while also receiving two more

Riis Baseball Coach

Next spring Terrusa will remain at Riis High to coach the school's first baseball team in nine years. Most of his baseball experience came while he was in the Army. During his duty he patrolled the outfield for the Camp Tokyo baseball team which defeated Japanese professional teams and service teams in 71 of 72 games.

During the past three weeks he has seen indications of outstanding things for the future—"The line is very limb he predicts a "good season."

this year's water polo team with one letterman and approximately 10 newcomers for the rough Metropolitan conference water polo season.

for water polo is urged to see me in the men's gym," said Follosco. The team practices at Birmingham High School daily. Bill Dutton is the only letterman

Backfield Sharp

Against Antelope Valley in last week's scrimmage, the Monarch backfield was tough. Although the only two Valley touchdowns were called back because of penalties, Coach Ker's backs made the team look "100 per cent better than last year's squad." Returning for the '63 season are two lettermen halfbacks, James Williams and Bill Halkyard, and fullback Mike Koutnik. Also hoping to see some action after an injury is last year's standout fullback, Howard Briles.

Challenging the returnees for their spots will be a group of newly enrolled players. At the halfs are Art Delgado of St. John Vianney, Art For Cage Cup Harding of Fairfax, Phil Culotta of Burbank, Pat Moscatello of Allemany and Howard Lurie of the USC Frosh. Fighting for the fullback slot will be 235-pound Charles Butler of Los Angeles High School, transfer Roger Ker from New Mexico and Hollywood High School, and Rudy White from Dorsey High School.

The addition of Paul Waldvogel of feated an Entre Nous squad 87-42 to Monroe High and Chuck Wendling of end the ninth summer of competi-Burbank High, last week may add to the overall strength. Although only outscoring Entre

Swimmer Ken Merten Prepares for Olympics After Meeting Japanese in Summer Tourney found himself having day-night- behind one American and one Japa-BY TED WEISGAL

Assistant Sports Editor

Ken Merten, a member of the 1963 Valley College swimming team which placed second in the state JC meet, is back at Valley. But Merten must be daydreaming about the wonderful time he had during the past sum-

What did he do during the summer? He swam. "So what's so great about that?

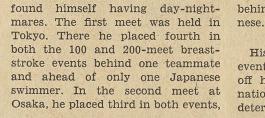

The answer: Okayama, Osaka, Nagoya and Tokyo.

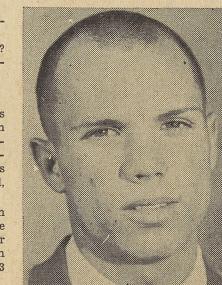

Represents US

Competing for the United States National swimming team, Merten was selected for the team after qualifying at the 1963 Senior Men's National AAU swimming championships held Aug. 9, 10 and 11, in Springfield,

The team which traveled to Japan converged here in Los Angeles the day after the nationals with their coach, Ralph Casey of Southern Methodist University and on Aug. 13 took off for Japan.

When the meets against the Japanese National team began, Merten

Off Form

His best time in the 200-meter event in the Far East was 2:36.8, far off his 2:34.5 time recorded in the national championship meet which determined qualification.

During his stay in Japan, Merten got a good look at the facilities which he hopes to be using in 1964...for the Olympic Games.

And on his trip home, which as well as his trip to Japan was paid by the Japanese Swimming Federation. he stopped off in Hawaii. During his free week in the 50th state. Merten learned to surf.

Valley Harriers Face Dilemma

From riches to rags.

This is the probable outlook for the cross country team as coach Charles Mann is faced with a disappointing turnout of only seven men for the 1963 hilltopper team.

With the loss of Dick Krenzer, last year's top runner, who is now attending the University of Washington, Coach Mann will have to start from scratch with a team composed of mostly freshmen and only one returning squadman. Last year Krenzer led the team to the Metropolian Conference Championship over second place San Diego.

when most dollar pens are of ink the Scripto Wordmaster® refill has enough left for a term paper ... and a couple of lab reports

> Just about the time you figure your Wordmaster should be running out of ink, unscrew the cap. The new seethru refill says in no uncertain terms that you've got enough ink left to go on writing for quite a while. You shouldn't be surprised. For even though Wordmaster is slim and streamlined, it has a much larger ink capacity than ordinary dollar pens. And that makes it just about the most inexpensive dollar pen around.

By the way ... you can get a handsome matching pencil to go along with your Wordmaster. And that's only a dollar, too.
